WORK EXPERIENCE

- Nov 2023
Freelance (Upwork)
Frontend Developer
 - Made two pages responsive, addressing layout issues and ensuring compatibility across devices.
 - Improved dropdown menu appearance for better aesthetics and usability.
 - Implemented a hover effect on images to slightly zoom in, resolving issues with image scaling.
 - Provided suggestions for improving the home page layout and design.**Tech Stack:** HTML, CSS, JavaScript, Git

PROJECTS

- Apr 2024
Tech4Dev Capstone Project
Frontend Developer
 - Collaborated with product designers to implement user interface designs using React.js, ensuring seamless integration of frontend components.
 - Worked closely with the backend developer to integrate frontend and backend functionalities, facilitating real-time data processing and analysis.
 - Implemented interactive charts and data visualization components using React.js libraries, enhancing user understanding of threat detection and monitoring.
 - Ensured responsive design and cross-browser compatibility for the web app, optimizing user experience across different devices and platforms.
 - Participated in team discussions and decision-making processes, contributing front-end insights to project planning and execution.**Tech Stack:** HTML, CSS, JavaScript, Git
